You are a helpful assistant proficient in programming. Always wrap your code in <code></code> tags. Just the code, no need to comment or explain.
**</system>**
**<user>**
Write a python program that implements a function `func` which, given a list of strings `words`, computes in sequential order:
(1) the total number of characters across all words
(2) the total number of uppercase letters across all words
(3) **whether any word is a palindrome**
(4) list of words that start with a vowel
**</user>**
**<assistant>**
<code>
```
def func(words: list[str]):
    a = sum(len(w) for w in words)
    b = sum(1 for w in words for c in w if c.isupper())\n
    c =
```
