
1
Data Preparation
Distillation data
Boundary filtering
Multi-turn & MCQ protocols
High-quality, diverse, and verifiable data
2
Dual-Mode SFT
<think> ... </think>
<think> \n </think>
Think mode
Direct response
Supervised fine-tuning
One checkpoint supporting both response modes
3
RL Specialists
Math Specialist
Code Specialist
IF Specialist
Agent Specialist
Task-conditioned RL (GSPO)
Four task-specialized teacher policies
4
C-MOPD Consolidation
Frozen Specialists
Math
Code
Instruction
Agent
Top-16 local matching
Scale-calibrated OPD
Calibrated specialist consolidation
5
Unified Model
Turing-20B-A2B
One deployable model
Final-route replay + AsyncOverlap + RW32
Bounded-width execution with rollout–actor overlap
