

Task: group blocks (group)
Goal: slide the red and blue blocks next to each other

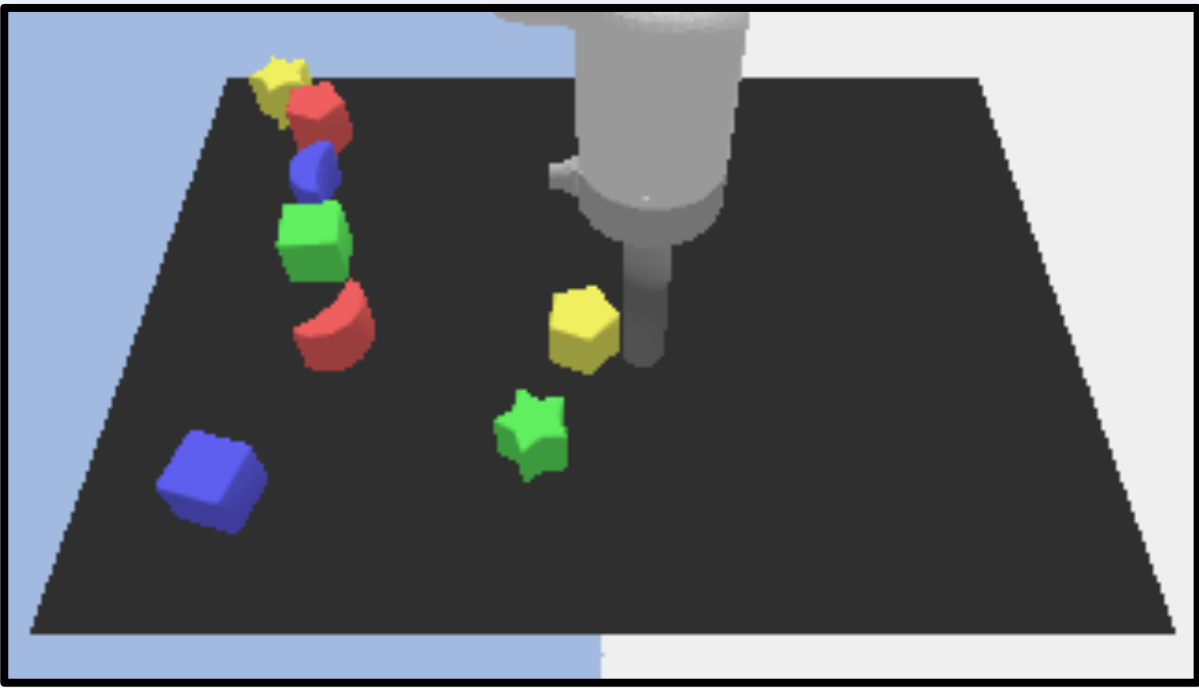

Task: make a line (line)
Goal: build a vertical line out of the blue and red blocks

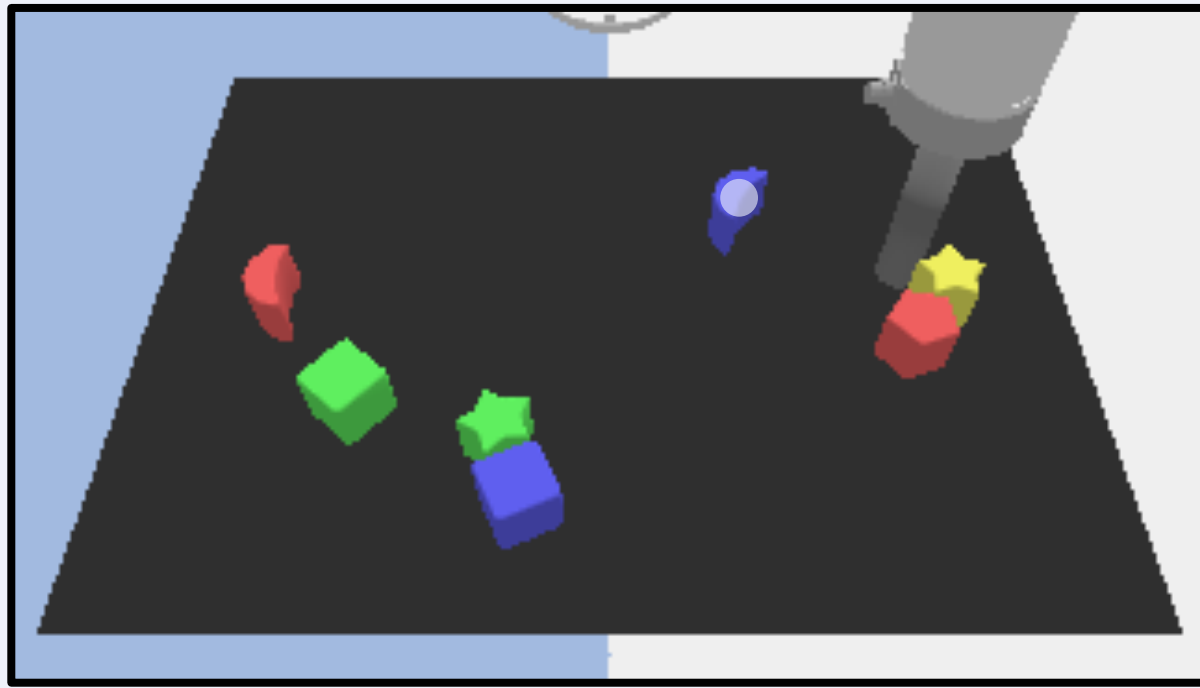

Task: make a V-shape (v)
Goal: create a V-shape out of the yellow star, the red moon, and the green star

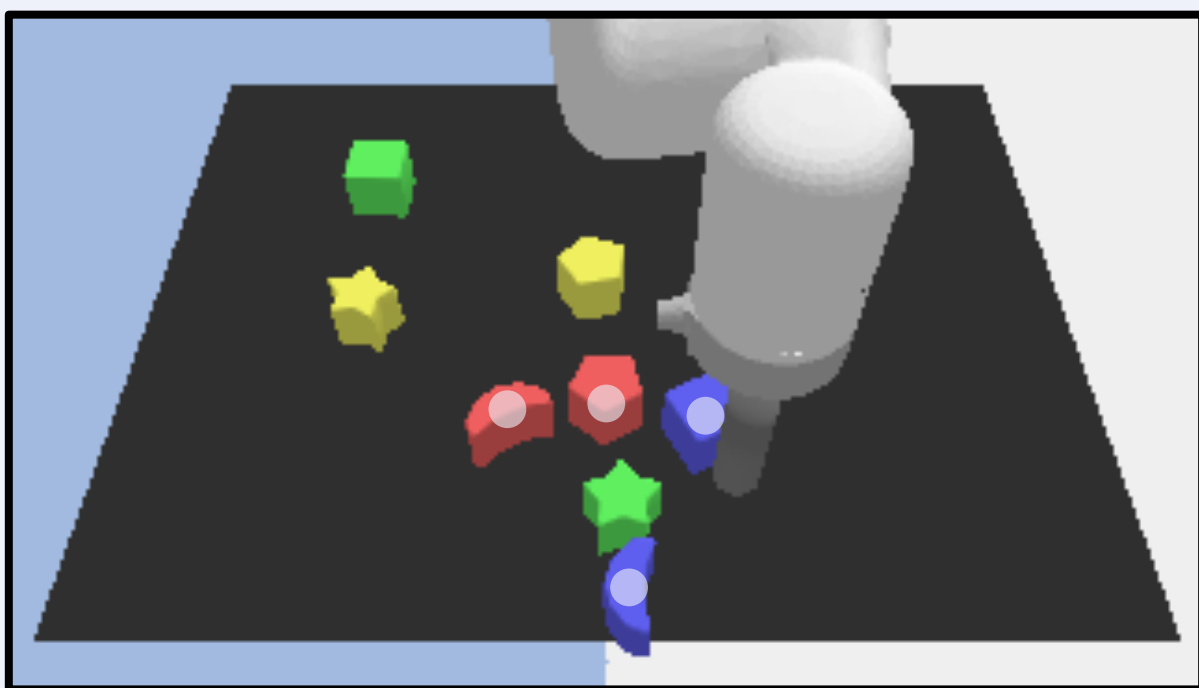

Task: make an L-shape (L)
Goal: put the green star, the red pentagon, and the yellow pentagon in an L-shape

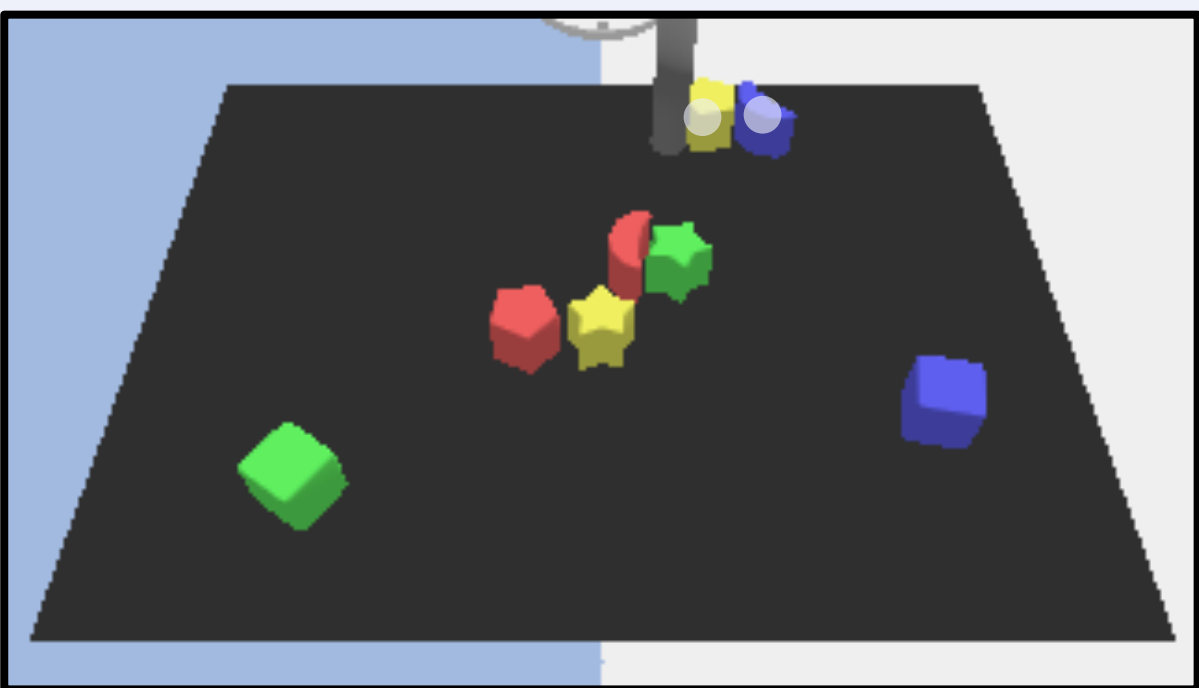

Task: clear quarter (clear_qtr)
Goal: remove every block from the bottom-right quarter of the board

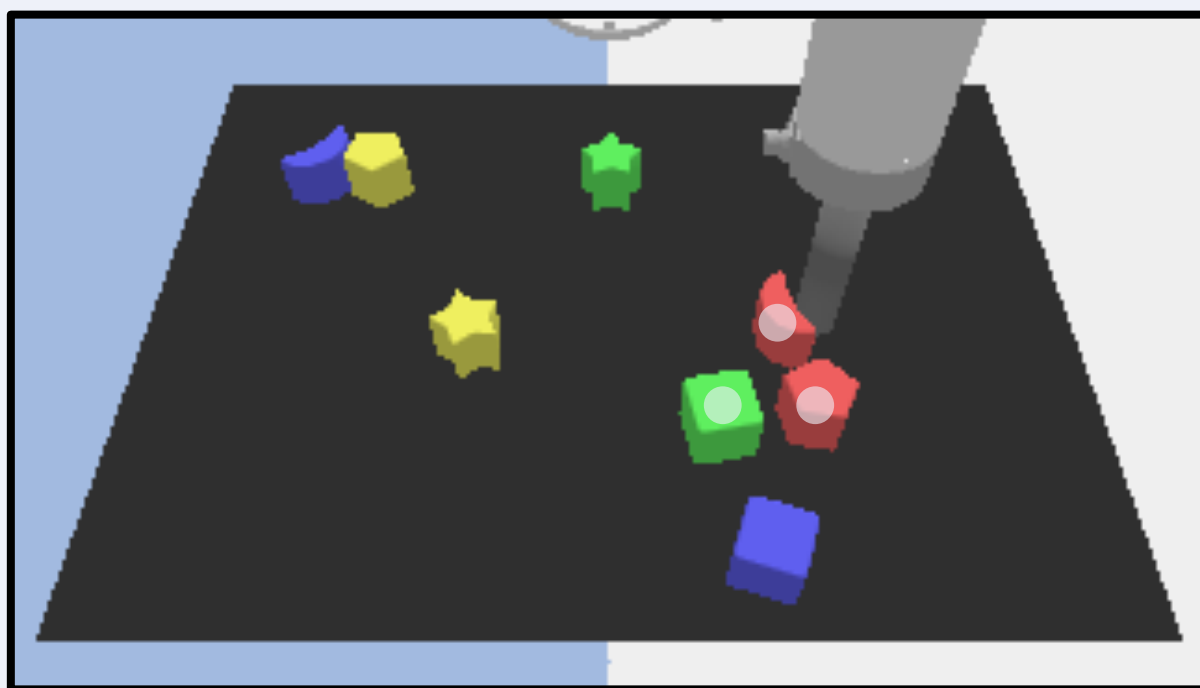

Task: isolate in place (iip)
Goal: move the other blocks away from the blue moon while keeping it in place

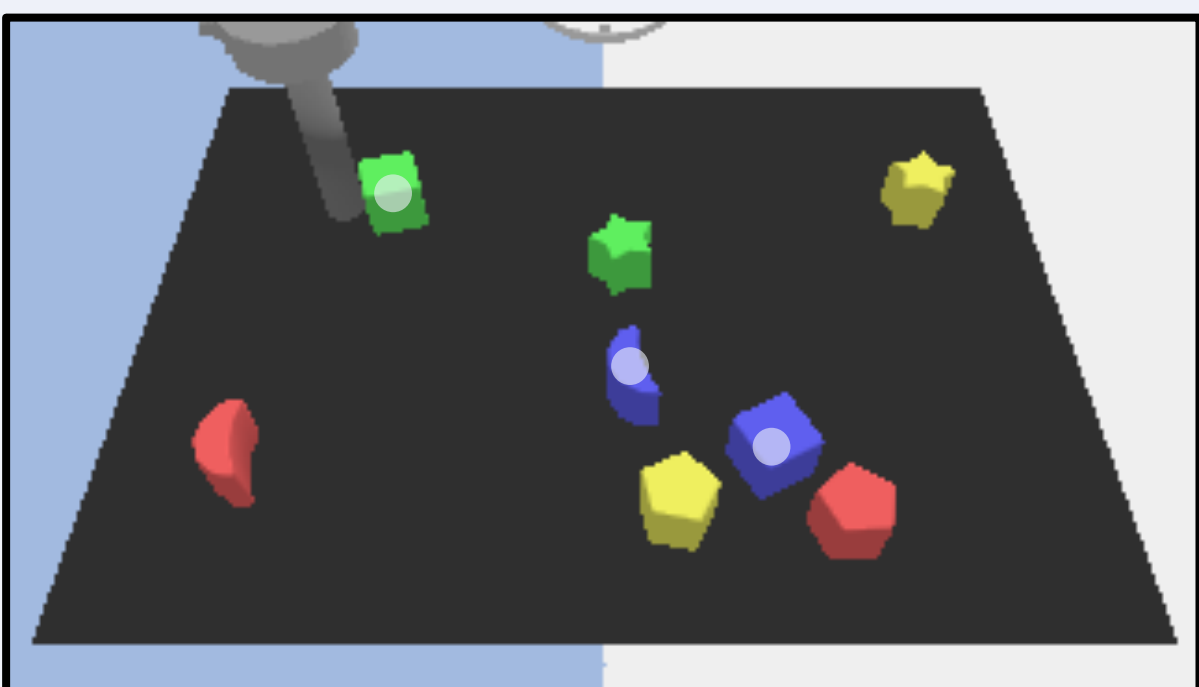

Task: make a T-shape (T)
Goal: build a T-shape with all the blue and red blocks

Task: group & isolate (gris)
Goal: move the the blue moon and the yellow pentagon as a group, so that no other blocks are close to them

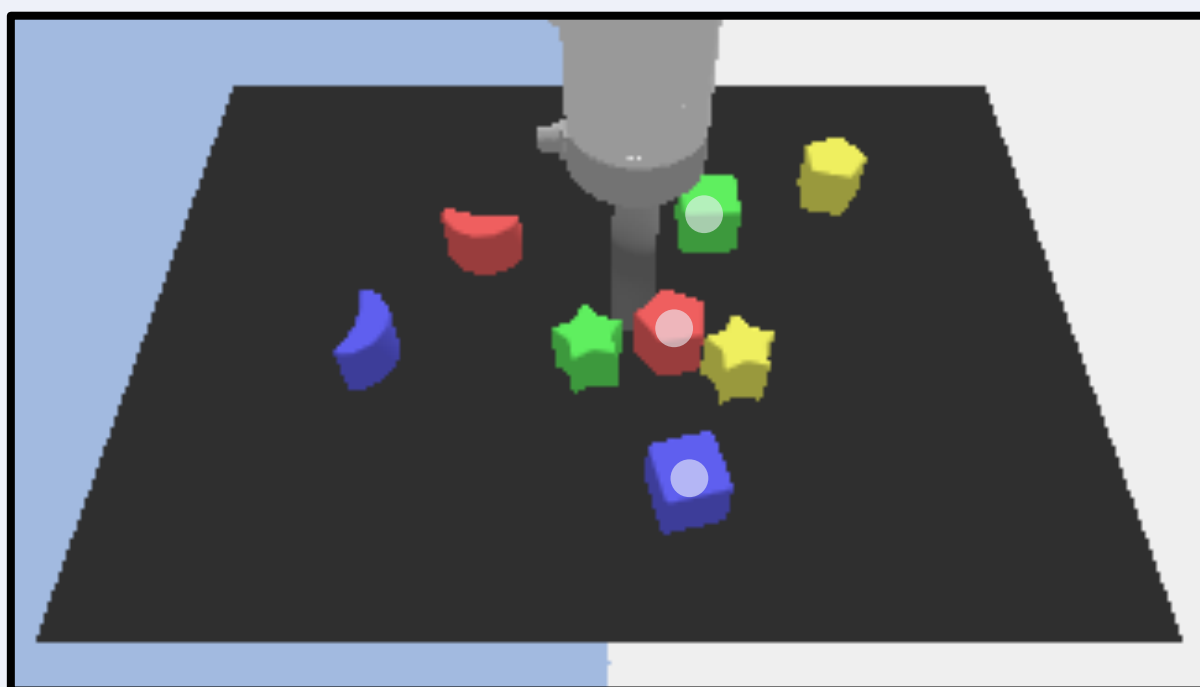

Task: make an inverted V-shape (iv)
Goal: build an inverted V-shape using the red moon, the green cube, and the red pentagon

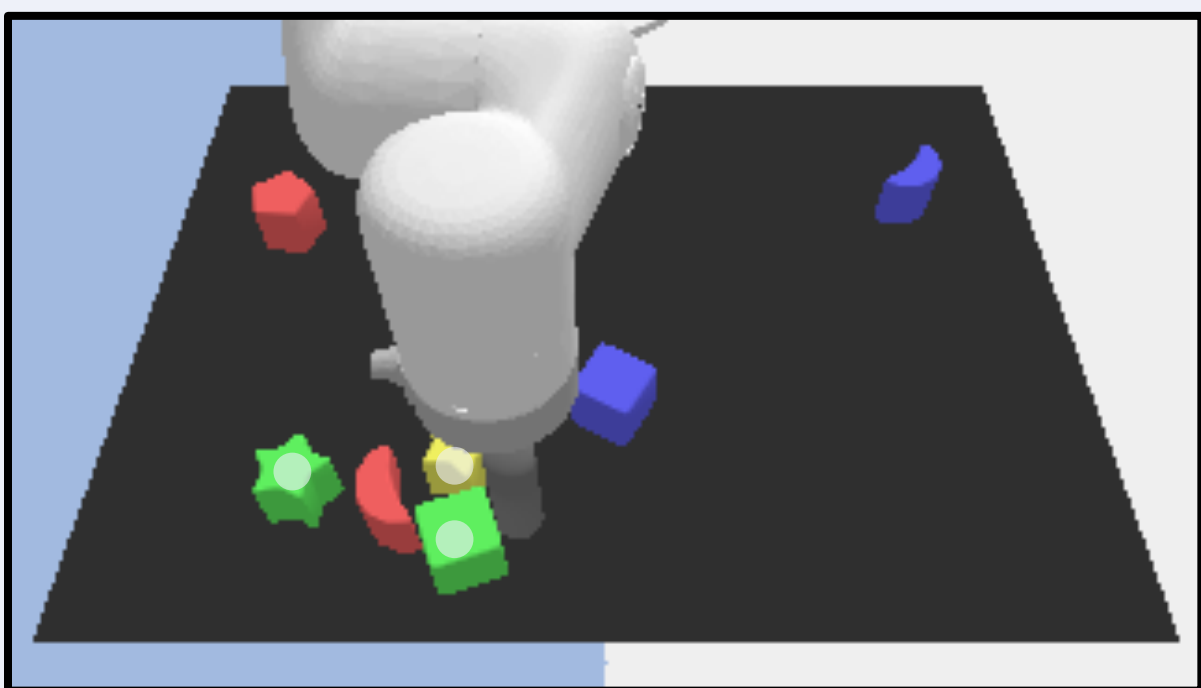

Task: make a diagonal line (diag_line)
Goal: move the blue moon, the blue cube, and the green cube into a diagonal line from top-left to bottom-right

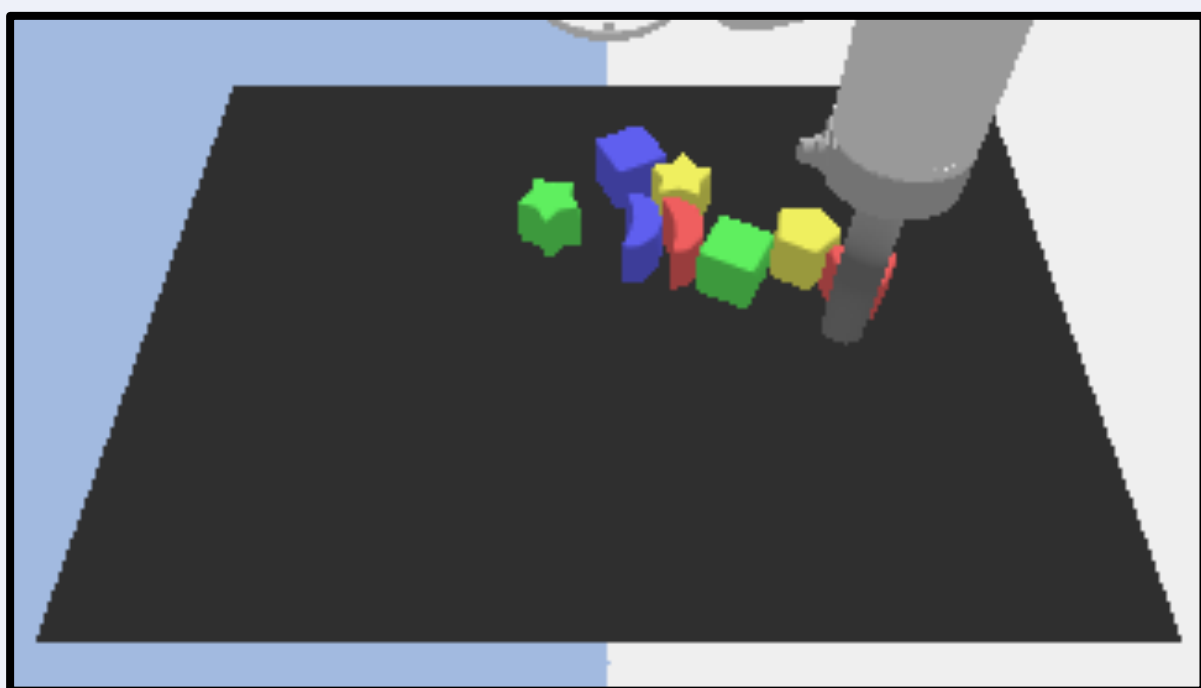

Task: make a rectangle (rect)
Goal: make an axis-aligned rectangle using all the blue and yellow blocks

Task: make a midpoint (mid)
Goal: place the blocks so that the red pentagon is at the middle point of the green cube and the blue cube

Task: make an inverted L-shape (iL)
Goal: make an inverted L-shape with the green cube, the green star, and the yellow star

Task: clear half (clear_half)
Goal: clear the bottom half of the board (everything below the horizontal midline)
