Mark point O at the midpoint of segment AB . Draw the segment PO from P to O . Draw the segment CO from C to O .

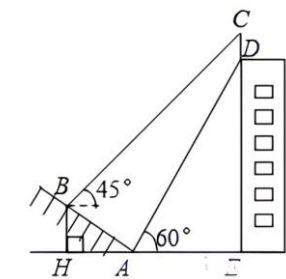

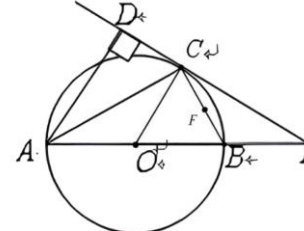

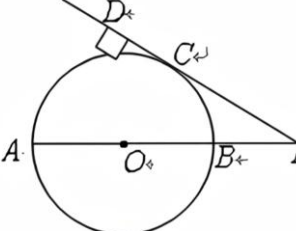

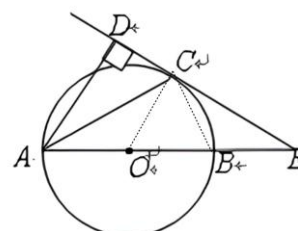

Draw the auxiliary segment AC as a dashed line connecting point A to point C .

Draw the perpendicular from D to AB , meeting AB at F , and label the foot F .

Draw the radius OC from the center O to point C . Draw the chord BC between points B and C .

Draw a horizontal line through B to meet the vertical CD at a new point F , and mark the right angle at F to indicate $BF \perp CD$.
