

How MLLMs' performance degrade in complex multi-chart scenarios?

Latent Graph support multi-chart VQA curation:

What might impact the reasoning performance?

Reasoning Pattern	Auxiliary Tools	Robustness
- Extended Context All intermediate data node separately as image input - Multi-hop in-Depth Minimal data node as image input	- Bounding Box Prediction Ground Truth - Points Prediction Ground Truth	- Perturbation Input Image Set Resolution Noise - Transformation Input Image Set Image-2 Style Transfer via GPT-Image-2
